PROFESSIONAL SUMMARY

B.Sc. IT student (Cybersecurity & Networking) with hands-on packet-level forensics experience — reconstructed multi-stage attack timelines from raw Wireshark captures and produced SOC-style incident documentation during a structured practical training program. Comfortable at the command line (TCP/IP, DNS, DHCP, VLAN diagnostics) and building end-to-end technical systems, from an IoT hazard-detection device to a deployed e-commerce platform. Looking for an entry-level NOC, IT support, or SOC trainee role where I can turn structured troubleshooting into real operational reliability.

SKILLS

- **Networking:** TCP/IP · DNS · DHCP · Wi-Fi · Routing & Switching · VLAN · FTTH/PPPoE
- **Security & Diagnostics:** Wireshark packet analysis · Nmap · Kali Linux · Incident documentation
- **Platforms:** Linux · Cisco Packet Tracer · GitHub
- **Programming:** Python · C/C++ · JavaScript · HTML/CSS
- **Soft Skills:** Customer-focused problem-solving, Adaptability, Teamwork, Organized documentation

EXPERIENCE

Cyber Security & Network Intelligence — Practical Training

Lovely Professional University (Industry-Aligned Program) | Jul–Aug 2026 | Punjab, India

- Completed structured Wireshark labs analyzing TCP, DNS, and HTTP traffic, isolating suspicious activity through protocol-level filtering and building a working foundation for SOC-style triage.
- Studied core attack vectors — phishing, malware, ransomware, DoS/DDoS — through the CIA triad and ethical hacking frameworks, with emphasis on defense principles including access control and basic network hardening.
- Used command-line diagnostics (ipconfig/ifconfig, ping, traceroute) to trace connectivity issues and identify faults at the IP, port, and DNS/HTTP layers — the same diagnostic sequence used in NOC first-line troubleshooting.
- Passed a graded mini-assessment on packet capture and filtering, validating hands-on competency rather than coursework alone.

PROJECT

Cyber Attack Investigation using Network Packet Forensics | Aug 2026

- Captured and analyzed packet-level traffic in Wireshark across multiple simulated intrusion scenarios, reconstructing multi-stage attack timelines from raw captures.
- Identified malicious traffic patterns using protocol-layer filtering (TCP, DNS, HTTP), isolating indicators of compromise from normal network noise.
- Translated findings into structured, audit-style incident reports aligned with basic SOC documentation practices — written for a non-technical stakeholder audience.
- Tech: Wireshark, TCP/IP analysis, incident documentation

Smart Fire Detection System (IoT) | Apr 2026

- Built an automated hazard-detection and alert-response system by integrating flame and MQ-series smoke sensors with an Arduino UNO and a relay-controlled water pump.
- Programmed real-time sensor polling and threshold-based triggering in Embedded C, achieving consistent detection across repeated test cycles.
- Added an I2C LCD display and buzzer for live system-status monitoring, ensuring continuous visibility during testing with zero missed alerts.
- Tech: Arduino UNO, Embedded C, IoT sensors, relay control

NepCart — Online Grocery Delivery Platform | Sept 2026

- Designed and built an end-to-end e-commerce flow — product search, category filtering, cart, authentication, checkout — in HTML, CSS, and JavaScript.
- Implemented local storage–based state management to persist cart, login, and order history across sessions with zero data loss in testing.
- Deployed to production on Netlify; live at sajalp1.netlify.app.
- Tech: HTML, CSS, JavaScript, Local Storage | Deployment: Netlify

Portfolio Website | Sep 2026

- Designed and built a fully responsive personal portfolio with project filtering and streamlined navigation, focused on fast, mobile-friendly access to project details for recruiters and hiring managers.
- Structured the site to surface technical work clearly — filterable categories reduce the clicks needed to reach any given project.
- Profile: sajalbhusalportfolio.netlify.app
- Tech: HTML, CSS, JavaScript | Deployment: Netlify

CERTIFICATIONS

Cisco Networking Academy: Ethical Hacker, Introduction to Cybersecurity, Networking Basics, Python Essentials 1 & 2 | Jan - Aug 2026

Summer Internship in Cyber Security & Network Intelligence — practical training certificate | Aug 2026

ACHIEVEMENTS & ACTIVITIES

- **Informal IT Support** — Peer & Family Network (Ongoing) | Self-directed | 2025–Present
 - Sole technical point of contact for 10+ households, independently diagnosing Wi-Fi, router, and ISP-side connectivity issues.
 - Translate technical root causes into plain-language fixes for non-technical users — directly transferable to client-facing IT support and Tier-1 NOC communication.
- **SCRIP Project — Child Rights Promotion**: Appreciation Certificate for community initiative contribution | Jul 2025

EDUCATION

Lovely Professional University — Punjab, India

B.Sc. Information Technology (Cybersecurity & Networking) | CGPA: 7.35/10 | Since Aug 2024

New Life Secondary School — Nawalparasi, Nepal

- *Intermediate(+2); GPA: 3.12/4.0 | April 2023 – March 2024*

Raja Mahatma Purna Bhadra Secondary School — Nawalparasi, Nepal

- *Matriculation (SEE); GPA: 3.25/4.0 | April 2021 – March 2022*
